BEING A NURSE

SUSANA FROUCHTMANN

160 PP

MEDICINE, TESTIMONY, SOCIETY

□ Many books tell us stories about doctors, but almost none had spoken until now of the indispensable work of nurses.

□ This book is a perfect gift for those in the nursing profession.

SYNOPSIS

Eleven nurses specialised in different areas (child oncology, emergencias, geriatrics, ambulance assistance, mental health, ward supervision, paliative care, surgery) take us through the daily life of a nurse, full of profoundly moving, little known anecdotes.

Although the diagnosis and treatment by doctors are essential, the day by day, the physical and emotional care of the patients depends on these anonymous caregivers. In doing so, nurses transform the science in art.

ABOUT THE AUTHOR

Susana Frouchtmann is journalist, writer, translator, teacher and consultant in Communication and Cultural Management. She has collaborated with La Vanguardia, El Periódico, El Observador, The Economist, Woman and Radio Nacional. She also published at Plataforma Mi cáncer y yo (My cancer and me). Therapy.

which he has been preoccupied with over the last few years, such as paliative care and old-age. His reflections on old-age and sickness are profound and yet show a rare common-sense.
