■ A book to wake your emotions and make you laugh with the most interesting taxi stories that have ever been told.

SYNOPSIS

In a taxi we are being ourselves. That's why taxi drivers know about the real nature of humans. This book gives a voice to taxi-drivers who are prepared to confess all they have seen, heard and kept a secret the other side of the rear-view mirror, when someone thinks that nobody can see or hear them. The rear door raises the curtain: amiable transvestites, people letting their hair down, highly-strung individuals, Armani nobodies, childish boys on the town, nice whores, drunk foreigners, lost ladies, two-timers with a tip ... Maybe you recognise a taxi driver. Maybe the story being told is your own.
